DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Replace the abstract with:

--The invention relates to a novel flame retardant and stabilizer combined, for thermoplastics, which comprises as component A, phosphinic or diphosphinic salts and/or polymers thereof, as component B, a nitrogen containing synergist or a phosphorous/nitrogen flame retardant, as component C, a basic or amphoteric oxide, hydroxide, carbonate, silicate, borate, stannate, mixed oxide/hydroxide, oxide/hydroxide/carbonate, hydroxide/silicate, hydroxide/borate or mixtures thereof, optionally as component D, a phosphonite or a phosphonite/phosphate mixture, optionally as component E, an ester or salt of montan wax 4, and as component F, an aromatic di- or tricarboxylic ester or aromatic di- or tricarboxamide, the entirety of the components always being 100%.--

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art because the prior art does not teach flame retardant and

Art Unit: 1751

stabilizer compositions comprising N,N'-bispiperidiny-1,3-benzenedicarboxamide and/or N,N'-bis(2,2,6,6-tetramethyl-4-piperidiny)-1,3-benzenedicarboxamide. The prior rejections are withdrawn in view of applicant's submission of the English translation of the German priority document 103 09 385.0 with a priority date of March 3, 2003.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 2001/0007888 teaches flame retardant compositions with some of the instantly claimed components but do not teach the instantly claimed benzenedicarboxamides. US 2003/0162868 teaches N,N'-bis(2,2,6,6-tetramethyl-4-piperidiny)-1,3-benzenedicarboxamide in a laundry list of hundreds of compounds but does not provide motivation to select that particular compound for inclusion into flame retardant compositions.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amina Khan whose telephone number is (571) 272-5573. The examiner can normally be reached on Monday through Friday, 8:30-5.
